Books by Location:

Note: Some of my locations are made up without names, so I've put them in Made Up Location: US, Made Up Location: Europe, & Made Up World. Books are also listed by primary location or one of the primary locations, even though the book may take place in more than one location. If the characters travel to multiple primary locations, that book may be listed more than once (i.e. Love Forged, which is about a trip with many locations and is relevant to the story, or a sports book, where they play in a specific location). I've listed the books under either a state or a country (and put the city, if relevant or known, in parentheses).
